

Dear Sir or Madam!

I am writing to protest the animal identification plan. It doesn't seem right to have to register every horse, chicken or cow on every farm, especially those who only have them for their own use and are not raising them for profit.

I am religiously opposed to computer chips in humans and I feel that is what it will come to if we allow them in our animals. The idea of the government having control over every ~~an~~ aspect of our personal lives scares me more than the risk of disease being spread. I believe God is in control of everything and when humans try to control things to strictly it only makes matters worse many times.

These are some things I am concerned about and I hope I don't offend anyone.

Sincerely
Paul Miller
